

What's new in ArcGIS Enterprise

10.8?

Esri started this year by releasing ArcGIS Enterprise 10.8, loaded with updates and enhancements throughout the product, from administration, to data, maps, and apps. Let's have a look at what's new in ArcGIS Enterprise 10.8!

Administrative

• Read-only mode

With 10.8, you can put all of ArcGIS Enterprise into read-only mode. In read-only, users can log into, and view content, in ArcGIS

Enterprise; but they will not be able to make changes to data, create or save items like web maps, or update administrative settings.

As an administrator, you can set ArcGIS Enterprise as read-only, within the portal Administrator Directory (shown below). Here, you can customize the message displayed to users, if an action is prevented because of read-only mode.

• Information banner

With the new information banner, you can customize a static message that appears for every user at the top and bottom of each page in the Enterprise portal. Your banner can notify users of upcoming system maintenance; direct users to new

The option to set ArcGIS Enterprise as read only in the Portal Administrator Directory
