

Map Description

This GIS-based Ward Map has been developed by the Urban Data Analytics Centre, Directorate of Urban Administration & Development (DUAD), Bhopal. It provides a comprehensive spatial representation of ward boundaries, road networks, properties, public infrastructure, and other urban features. The map serves as a decision-support tool for Urban Local Body (ULB) officials, facilitating efficient urban planning, infrastructure management, property tax administration, field operations, and evidence-based decision-making for sustainable urban development.
