Geocortex Essentials

We add value to core Esri technology

Our work extends what's possible with Esri's ArcGIS platform. Geocortex requires and works exclusively with Esri GIS technology.
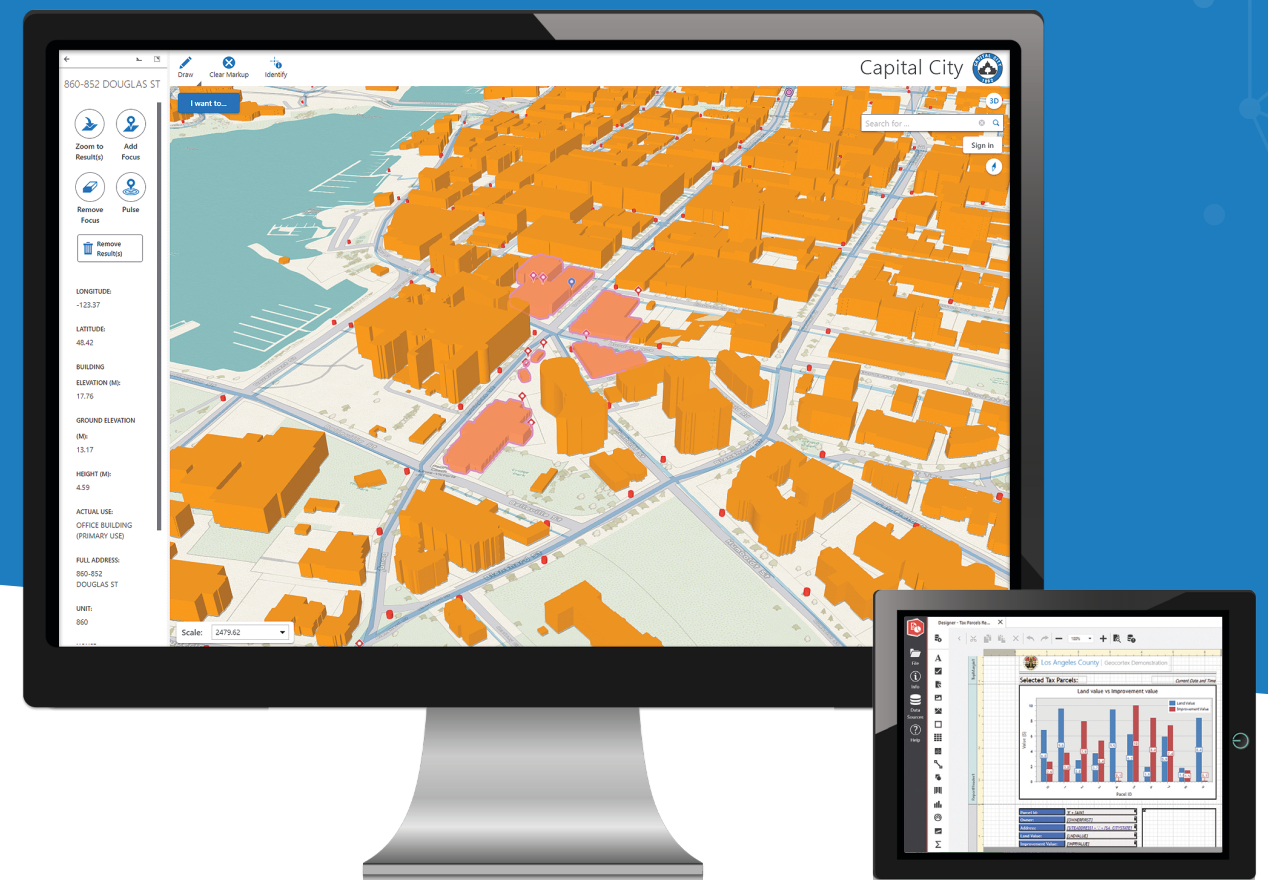

A history of success

Since 1999, we have guided our customers through major shifts in technology and engineered our products alongside Esri's evolving GIS platform.

Our customers are innovators

Our mission is to help you accomplish even more with your Esri investment. Our customers are recognized as leaders who build applications that tackle complex problems to make a meaningful difference in the world.

Create purposeful, intuitive apps with powerful tools and capabilities:

Viewer Frameworks
Design targeted mapping applications for desktops, tablets, and mobile devices that can also work offline.

Workflow
Streamline and automate complex work processes to increase efficiency and save time.

Integrations
Link spatial and non-spatial databases, files, or web services: embed them into reports, searches, and forms.

Instant Search
Access the information you need quickly with a highly-scalable and indexed search engine.

Accessibility
Offer a flexible experience – for users of all abilities – and meet international compliance standards.

Collaboration
Share text messages, images, and other real-time content within your applications.

Security
Manage access – at the application level – to specific features with fine-grained permissions.

Printing
Create templates for large-format, high-resolution outputs.

Reporting
Visualize important data and share pre-configured reports.

Choose your viewer framework and get started.

Different licensing options make it easy to use any of the Geocortex Essentials 5-Series products above in your viewer(s) of choice.
