

Geocortex Essentials

We add value to core Esri technology

Our work extends what's possible with Esri's ArcGIS platform. Geocortex requires and works exclusively with Esri GIS technology.

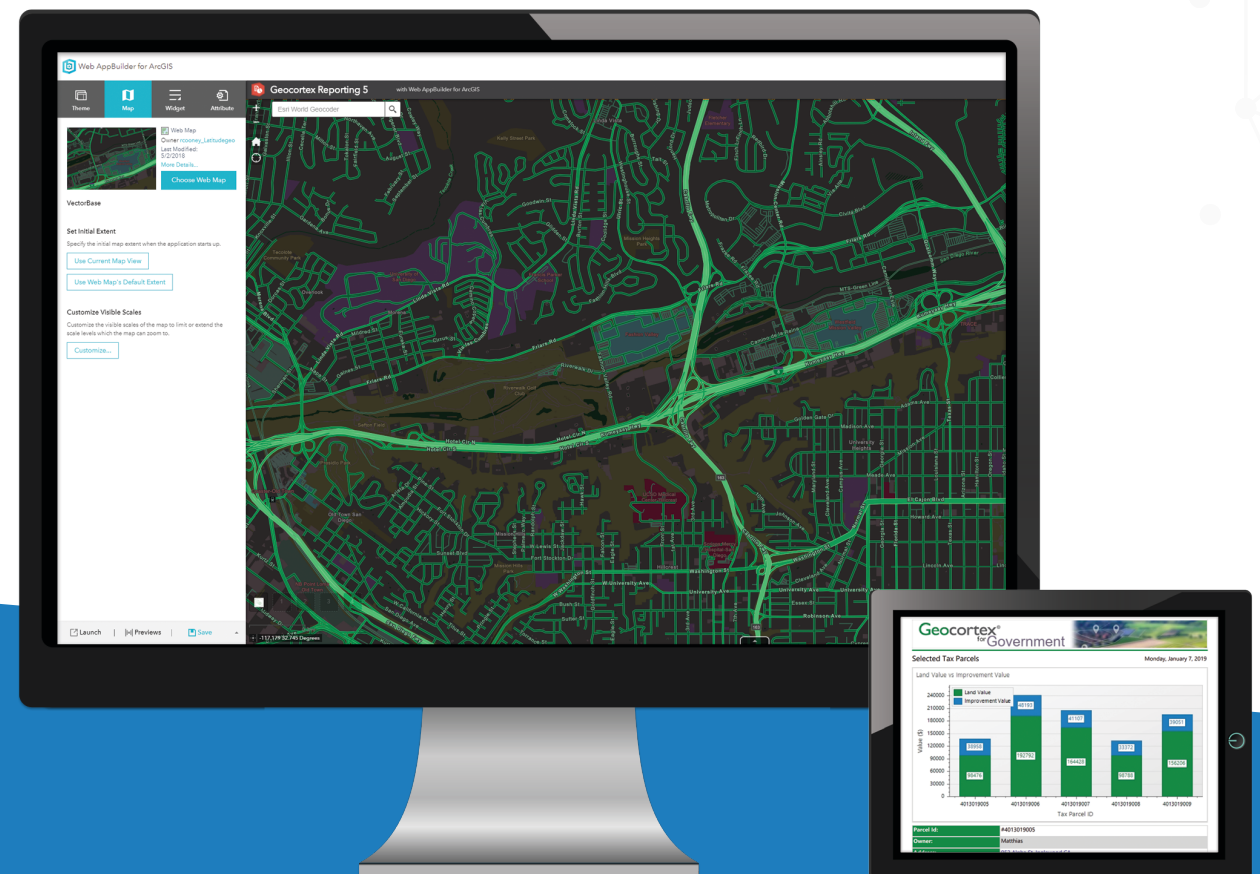

A history of success

Since 1999, we have guided our customers through major shifts in technology and engineered our products alongside Esri's evolving GIS platform.

Our customers are innovators

Our mission is to help you accomplish even more with your Esri investment. Our customers are recognized as leaders who build applications that tackle complex problems to make a meaningful difference in the world.

Geocortex®

Access the most popular capabilities of Geocortex Essentials
for use exclusively within Web AppBuilder for ArcGIS.

Accomplish even more with Esri's ArcGIS platform.

Geocortex Workflow 5

Turn sophisticated business processes into
a set of simple, guided end-user interactions.

Geocortex Reporting 5

Gather, organize, and share key data with the
right people with configurable reports.

Geocortex Printing 5

Generate high-quality, high-resolution
map print outputs in all sizes.

▪ Widget Development

Avoid custom development and build widgets
to guide your end users using a rich library
of pre-built activities that chain together to
automate almost any task.

▪ Designer

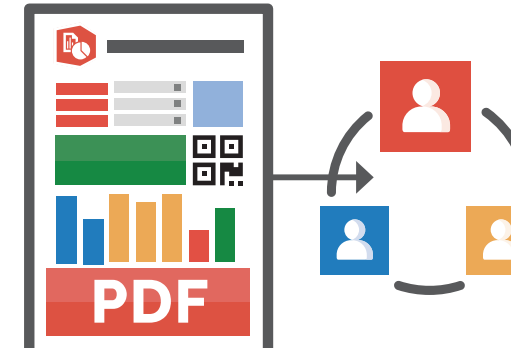

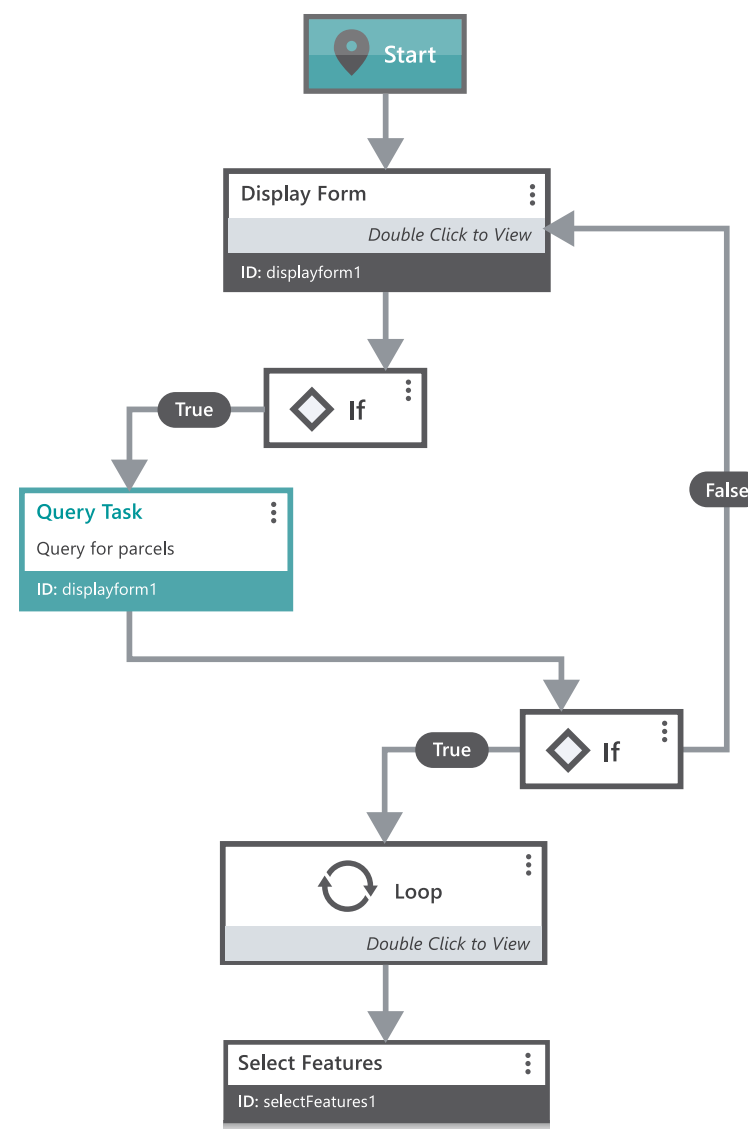

Build widgets right in your browser or
on-premises in an intuitive, drag-and-drop
design environment.

▪ Forms

Re-imagine the user experience with
dynamic forms. Cascading drop-downs and
an advanced event-based system allow you
to engage users with extraordinary flexibility.

▪ Offline Use

Download workflows and run them in your
mobile viewer, keeping your team productive
even without network connectivity.

▪ Designer

Build reports, using drag-and-drop functionality
and a wide range of ready-made controls in a
clean, straightforward design experience.

▪ Charting

Visualize and understand critical relationships
in your data with customizable charts.

▪ Integrations

Integrate data from non-GIS business systems
such as ERP, document management, asset
management, and business intelligence systems.

▪ Spatial and Tabular Data

Bring together maps, spatial data, and relational
data from a wide range of sources.

▪ Designer

Create templated print outputs in your
browser or on-premises in a clean,
straightforward design environment.

▪ Flexibility

Support large formats, high resolutions, raster
and vector data, and vector tiles to print
virtually any type of map you need.

▪ Smart Legend

With Geocortex Printing 5, the legend on your
printed map automatically adjusts to show
what is actually visible on the map.

▪ Security

Have multiple user types who have different
printing needs? Control access to various
print templates with in-app security.

Geocortex Essentials is also available as a full suite of capabilities alongside
an industry leading viewer framework. Visit www.geocortex.com to learn more.
