esri Partner Network Platinum

Geocortex enhances the applications you build with Esri technology

We add value to core Esri technology

Our work is impossible without Esri's outstanding ArcGIS platform. Geocortex requires and works exclusively with Esri technology.

Geocortex is your alternative to costly custom development

If you are pushing the boundaries of what's possible with Esri's ArcGIS, Geocortex is your alternative to custom application development using core APIs and SDKs, which can be costly and time consuming.

Alongside and inside your Esri apps

Since 1999, Esri customers have benefited from Geocortex Essentials' viewer framework and suite of powerful capabilities to help them accomplish even more.

The introduction of Geocortex Essentials 5-series products represents a major shift for Geocortex: for the first time, Esri customers can harness the power of Geocortex inside their Esri applications. As technology evolves, we will continue to offer powerful tools that Esri customers can leverage in different environments.

Geocortex Reporting

Build beautiful, configurable reports that deliver key information to the right people.

Geocortex®

Geocortex®

Gather, organize, and share your data

A clean, straightforward design experience
Configure reports right in your browser using drag-and-drop functionality and a wide range of ready-made controls.

Choose how your information is displayed
Geocortex Reporting ships with a collection of highly-configurable charts to help you visualize and understand critical relationships in your data.

Bring all your key data together
Third party APIs allow you to integrate data from non-GIS business systems such as enterprise resource planning (ERP), asset management, and business intelligence.
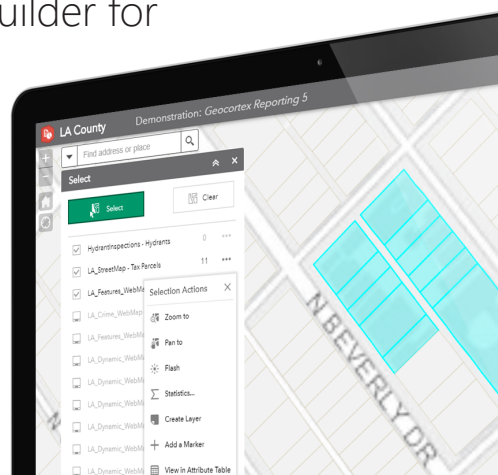

Everything you need to get the job done
From broad and general to focused and specific: choose from a vast set of tools to configure reports that best suit your needs.

Choose the data that suits you
Designed for Esri's modern ArcGIS platform, you can bring tougher maps, spatial data, and relational data from a wide range of sources.

Simplified reporting for your Geocortex and Web AppBuilder for ArcGIS applications

Reports come in all shapes and sizes – from basic mailing label reports to inspection compliance reports for governing bodies like FEMA – and can range substantially in terms of complexity.

Geocortex Reporting simplifies the often-manual process of collecting and compiling data from a range of sources. With an intuitive design experience, versatile visualization options, and third party APIs you can meet virtually any reporting requirement.

Complete deployment flexibility
Choose the licensing options that best suit your needs, whether you want to deploy reports in Web AppBuilder for ArcGIS, Geocortex, or both.

Enhance your Web AppBuilder for ArcGIS® apps

Geocortex Reporting delivers powerful functionality to Web AppBuilder for ArcGIS users, and enables you to design and deploy production-ready, printable reports inside your applications.
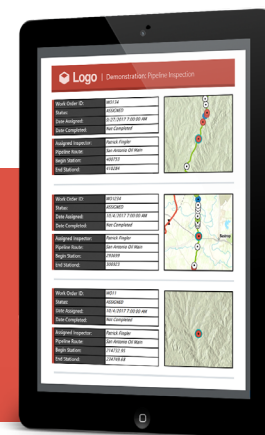

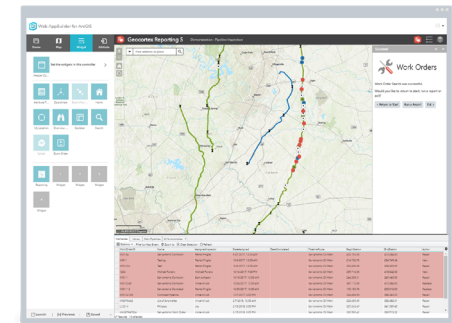

Application administrators can add the Geocortex Reporting widget to apps built with Web AppBuilder, allowing their users to generate reports from ready-made templates.

Reliable, market leading technology

Built upon past success
Geocortex Reporting builds upon the extremely popular capabilities of *Geocortex Essentials*, which helps more than 1,500 organizations around the world operate more efficiently, communicate more effectively, and improve decision making.

Positioned for a better tomorrow
Geocortex Reporting is part of a series of standalone products that make powerful Geocortex capabilities available for use inside Esri applications.
