### **Abstract**

Vehicle tracking system is one of the fastest growing GPS application. National security depend on single person to whole population of nation.vts is very useful in that manner. No doubt VTS play important role in security system to provide real time monitoring, past information of vehicle and other facility. But it has need to enhance application feature.e.g.it should be provide instant geocodede picture within some time interval.Which picture stored by vehicle owner(gov/pvt sector ) After than not only find the track of hack/stolen vehicle but also saw true condition of vehicle. No one terrorist can use vehicle for crime /can do plane for crime in native vehicle. After than VTS can assist in effective anti crime operation and internal security VTS solution is more effective to prevent crime than other security law.
